Greetings!

Two new mineral rooms (rooms 11 and 12) have just been added online this evening to complete the second Tucson 2007 update!

Today's new rooms are located here...

Now that the second update is complete and online, it's time for me to get started on the next update which will appear shortly. The third update will include a good number of Sweet Home and Chinese Rhodochrosites so stay tuned and watch for the next update notice coming soon!

Have a great weekend!

Kevin
