Subject: Greenside Minerals - New Specimens

Hi,

This update features some top quality and very aesthetic zeolites from the Deccan Traps flood basalt province in India. We have included affordable classic red fluorite, cavansite, a 60mm heulandite and two visually pleasing red apophyllites, one accompanied by a highly fluorescent powellite crystal

The specimens will be in our preview area for the next 3 to 4 days. This means they are only available for viewing and purchase by registered visitors

Regards,

Gary Atkinson
