Subject: ** TMG Mineral Auction #112 is Open for Bidding! **

Greetings!

* Announcing the opening of The Mineral Gallery's Wholesale Mineral Auction #112 *

This is our third wholesale auction and the past two have been a great success! This version promises to be even better with 34 top quality mineral specimens at wholesale or below wholesale opening bids. Many of these specimens are offered at half price or less!! There should be something to make everyone happy and hopefully every specimen will find a new home by auction close.

TMG Mineral Auction #112 can be visited at this link...

* Other News *

I've added two new rooms to the Summer 2007 Updates - Rooms 6 and 7! Room 8 is almost ready to go and will be online this week. It will feature many of my most recent finds from my travels including a gorgeous gem Emerald on dark Calcite from Columbia, an incredibly sharp Covellite cluster from Butte, Montana and a CABINET sized Covellite plate from Butte dating back to 1910! This is easily the best and largest Covellite I've seen outside of a museum!! I'll also have rare golds from the mines in Lead, South Dakota and Italy as well as unique specimens of Silver in matrix from a locality near Deadwood, South Dakota. Don't miss this update!

Summer 2007 Rooms 6 and 7 can be found at these links...
