**Subject:** Greenside Minerals - New Specimens

Hi,

With this update we are putting more of our English, Scottish and Irish specimens on the website. They include the ever popular blue fluorite from the Ullcoats section of the Florence Mine in Cumbria, dolomite and cinnabar (both from Ireland) and two attractive quartz pseudomorphs after baryte from Scotland

We've also added another good quality witherite from Alston in the Northern Pennines Ore Field and two amazing Yorkshire cerrusite specimens

Regards,

Gary Atkinson
