Subject: New Find of Fluorapatite

Welcome to Wrights Rock Shop

There has been a major new find of fluorapatite from the Sapó Mine in Brazil. these range from very unusual stalactites and elongated crystals with excellent luster.

I was fortunate to select the best of the available specimens and will post the specimens as soon as I return home.

China has produced a superb chalcopyrite on calcite that has individual calcite crystals up to 10 inches.

Chris
