TIME IS SHORT! REGISTER NOW FOR THE FALL EDUCATION CONFERENCE

This year, AAPG is joined by SEG in offering our Fall Education Conference on the theme of **Stratigraphic Traps**. The Conference will be held **September 10-14, in Houston**, with 12 courses to choose from centered around this theme. Click for [complete conference details](#).

"K2", "Mad Dog", "Block 446" *Free - Try it now!*
Finally, a search engine that knows these are names of oil wells and a lease block - not a mountain, a crazy dog, or a jail cell...

PRACTICAL SALT TECTONICS COURSE OFFERED TWICE THIS FALL

The AAPG's [Salt Tectonics Course](#) will be a 2-day course, November 16-17, where you will receive 3 days of expert instruction from Dr. Mark Rowan. This course is in conjunction with the AAPG European Region Conference in **Athens, Greece**, which takes place **November 18-21**.

ATTENTION EASTERN SECTION MEMBERS

A new course on [EOR and the Expanding Field of Carbon Dioxide Flooding](#) has been scheduled for **September 16**, in conjunction with the **Eastern Section meeting in Lexington, KY**. This course will be taught by industry expert Steve Melzer and local authority Bernie Miller, and has

08/24/2007

a special discount registration fee of just \$50.

SEPTEMBER FIELD SEMINAR STILL HAS A FEW OPENINGS

If you are interested in studying fractures and fold belts in Montana, you should sign up to attend our field seminar on "[Fractures, Folds and Faults in Thrusted Terrains](#)", **September 10-15**, which begins and ends in Great Falls, Montana.

GEOLOGISTS AND GEOPHYSICISTS BOTH BENEFIT

Geologists and geophysicists both benefit from the AAPG course on "[Seismic Stratigraphy and Seismic Geomorphology into the 21st Century](#)", which will be held **September 22-23**, in conjunction with the **SEG annual meeting in San Antonio, Texas**. This course is taught by renowned expert, Henry Posamentier.

TRAIN YOUR STAFF

Norm Hyne will be teaching the "[Basic Petroleum Geology for Non-Geologists](#)" course December 4-6, 2007, in Houston, TX. This course is valuable for geotechs, landmen, and company support staff who work with geologists could benefit from a non-technical course that explains the language and processes of petroleum exploration.

CALL FOR PAPERS

DATA FUSION: COMBINING GEOLOGICAL, GEOPHYSICAL AND ENGINEERING DATA

An SEG/AAPG/SPE Joint Workshop to be held October 14-18, 2007 in Vancouver, British Columbia, Canada at the Renaissance Vancouver Hotel Harborside.

The organizing committee kindly invites you to contribute to this workshop. Of particular interest are case studies showcasing successful examples of data fusion, instances that highlight potential pitfalls, together with any lessons learned. We encourage in-depth analysis of underlying data architectures, interdisciplinary interfaces, data fusion workflows and related methods. We are also quite interested in out-of-the-box ideas that explore and exploit the concept of data fusion beyond our core disciplines of geology, geo- and petrophysics, and reservoir engineering. We are planning for both poster and oral presentations and will discuss progress and problems in breakout sessions. Data fusion related software solutions will be featured during a "vendor showcase" - please contact the organizers if you want to participate in this special session. Click for [complete workshop description](#).

2008 Education Calendar

Keep an eye on the website, and check your November issue of the AAPG Explorer for the complete listing of AAPG courses and field seminars to be offered in 2008. We have lots of new courses, our annual Winter and Fall Education Conferences, several GeoTours, and many of our perennial favorites for you to choose from!

Attention Grad Students!

In exchange for helping out with the on-site logistics of our short courses, your registration fee is waived!! Only one slot per short course. [Learn more...](#)
