Subject: ** Denver 2007 Update #1 is Online! **

Greetings from the Denver Mineral Show!

Today, the first of the new specimens are online and ready for viewing in Denver 2007 rooms 1 through 6! There are 120 specimens in total in the first update, including some incredible gem minerals, unique Quartz combos, exceptional Silvers and Coppers, and old locality classics. Also available are a wide assortment of Fluorites, Calcites, Rhodochrosite, Tri-State specimens, Barites, Inesite specimens, and even a huge Meteorite from Argentina! Add to that some fine specimens from the Ed David, Charlie Key, Evan Jones, Freilich and Goings Collections and there should be something for everyone in this update!

The first Denver 2007 Update can be found at this link:

<http://www.exceptionalminerals.com/denver2007.htm>

All of the six new rooms can be accessed using the link menu at the bottom of every page.

Enjoy the new minerals and please e-mail if you have any questions or wish to make an offer. I'll be in Denver for the next six days acquiring addition items for future updates so if you have a want list for the show, please let me know.

Thanks!

Kevin
