Hi everyone,

Just a reminder that we will be at the **Surry Hills Festival**, Prince Alfred Park, Sydney on Saturday 13th October, and we will definitely be at the **Lane Cove Village Fair**, Longueville Road, Lane Cove on Sunday 14th October.

And next weekend we will be in Inverell from Friday October 19 to Saturday October 20 at the **Inverell & District Lapidary Club's Sapphire City Gem & Craft Show**, Inverell Town Hall, NSW.

And then to round out the month, we will be at the **Lapidary Club of NSW Gem, Jewellery and Minerals Show and Sale**, 136 Reservoir Street, Surry Hills NSW on Saturday October 27 & Sunday October 28:

We have new stock to whet you appetite during the southern spring and northern autumn.

We have a few new conichalcite specimens at the moment, but this one from Dome Rock Mine, Olary, South Australia is a bit different from some that we have featured in the past.

<http://www.aamineralspecimens.com/servlet/the-251/conichalcite-olary-south-australia/Detail>

A specimen of the rare mineral, Decrespignyite-(Y) from Paratoo Mine, Yunta, South Australia

<http://www.aamineralspecimens.com/servlet/the-265/decrepignyite-paratoo-south-australia/Detail>

A very nice Hyalite Opal from Bells Mountain, Queensland, Australia

10/12/2007

<http://www.aamineralspecimens.com/servlet/the-268/hyalite-queensland-australia-opal/Detail>

A really interesting sample of Kutnohorite & Calcite with a range of textures, structures and colour, from Broken Hill, New South Wales, Australia

<http://www.aamineralspecimens.com/servlet/the-270/kutnohorite-calcite-broken-hill/Detail>

An absolutely stunning example of pyromorphite with malachite from Rum Jungle, Northern Territory, Australia

<http://www.aamineralspecimens.com/servlet/the-269/malachite-pyromorphite-rum-jungle/Detail>

A good torbernite showing a number of blade-like crystals distributed over a copper carbonate rich argillic matrix.

<http://www.aamineralspecimens.com/servlet/the-264/torbernite-shaba-congo-copper/Detail>

A nice cluster of quartz crystals. The main crystal has an interesting set of terminations at one end.

<http://www.aamineralspecimens.com/servlet/the-260/quartz-crystals-china/Detail>

A large cabinet display sample consisting of a layer of very fine golden **Pyrite crystals** draped over a layer of large **Calcite crystals** mounted on a series of aligned **Quartz crystals** and backed by a layer of fine intergrown sulphide crystals.

<http://www.aamineralspecimens.com/servlet/the-272/pyrite-calcite-quartz-sulphide/Detail>

And a really stunning display specimen of Anglesite and Cerrusite from Broken Hill.

<http://www.aamineralspecimens.com/servlet/the-267/anglesite-cerussite-broken-hill/Detail>

We have more **new** stock on display on our website including antlerite, some very different azurite, cassiterite, andradite, smithsonite, native copper and actinolite. And we are adding new material all the time.

All the best,

Susan and Bruce
