Subject: Small transparent diopase, fluorite, calcite and others

Welcome to Wrights Rock Shop

I updated Gallery 2 with some small, but very transparent crystals of diopase, calcite, blue apatite, fluorite and others on 12/21/07.

I updated Gallery 3 with stibnite and calcite, hexagonite, calcite, fluorite, tetrahedrite, smithsonite, tourmaline, and others on 12/21/07. The largest, most complete lepidolite after muscovite with muscovite was included in this update.

I have new shipments of unusual calcites that I will be posting after Christmas and some excellent twins of fluorite, new barite, silver and calcite from Morocco will be arriving soon.

Please mention that you are a member of Wrights Mineral News for your 10% discount.

MERRY CHRISTMAS

Chris
