Dear Dave Barthelmy,

AA Mineral Specimens Newsletter 21 June 2008

Well, here we are finally issuing our newsletter from our own website!

Please note you may have to add our customerservice email address to your address book, or add us to your list of trusted senders to see the images in this newsletter.

It's a great feeling to know everything is all in one place and there is less room for error when we email you. The amount of time we have been spending compiling the newsletter can now be spent putting more specimens onto our site.

If you click on an item in the newsletter and it shows on our site as unavailable, this usually means it has been sold since the newsletter went out.

Over the next six months we will concentrate on adding useful information to the site. We hope to include mineral specimen labels, basic data on a range of minerals, and a greater range of links to other sites to help you develop your knowledge and enjoyment of minerals and fossils.

For now, we have listed our itinerary for the next six months, plus the still-available specimens that have been added to our site since our last newsletter.

Happy collecting!
Susan and Bruce.
