Time is running out – don't miss this opportunity to learn from the best!!

World-renowned structural geologist Charles F. (Chuck) Kluth, and equally well-known fractured reservoirs expert, Ronald A. (Ron) Nelson, have teamed up to teach AAPG's course on "[Application of Structural Geology in Prospecting in Thrusted & Extended Terrains](#)." This 5-day course will be held August 4-8, 2009, in beautiful Jackson Hole, Wyoming, and includes a full-day field trip to study not only the local geology but also some of the cultural history of this unique setting, with stops in the Grand Tetons, Hoback Junction, Granite Creek and Teton Pass, among others.

All the details for [this course](#), as well as information on all our other courses can be found on the AAPG website [Education Page](#). If you have questions, please call the AAPG Education Dept. at (918) 560-2650, or e-mail us at educate@aapg.org.

See you in Wyoming!!
