## AA Mineral Specimens Newsletter

19th July 2008

Dear Dave Barthelmy

Since our last newsletter we have concentrated on making our current and previous newsletters available on the AA Mineral Specimens website over the last couple of weeks. We hope this will prove particularly useful to those who have trouble viewing the newsletter on their email. We can only display newsletters that have been generated since we migrated to the new site. To see the newsletters, just go to <http://aamineralspecimens.com/Default.aspx?tabid=153> or click [here](#).

We've also set up a 'Featured' section on the Home Page, where we can highlight more interesting specimens from our stock. We've added 'Featured Items' to the newsletter, too.

Happy Collecting!  
Bruce and Susan
