**Subject:** New Addition Updates

hi Folks,

This is a little late as several of the species just posted have been sold. However there are a few **Sampleites** from the new locality of Eñgano Feliz Mine, **Las Pintadas District, Copiapo, Atacama Prov., Chile still remaining.** These are fabulous neon blue crystals to 4mm.

**Other species included in the last two updates are:**

**This week:**

Aldermanite (more available)

Brewsterite

Gilalite

Gold –Emperor mine

Guarinoite

Kambaldaite

Khaidarkanite

Molybdophyllite

Sampleite – new locality!

Sanromanite

Schneiderhohnite

Tuperssuatsiate

Vladimirite
