Subject:	Large Update/New Auction Specimens

We are proud to announce the acquisition of the Steve Pullman collection. Over 25,000 neat specimens, the collection is rich in neat historical pieces, locality specimens, display pieces, thumbnails (probably over 8000 of these alone), rare species, etc. These will make a great compliment to the Lloyd Tate collection specimens. We plan to update every Thursday with a good mix of material from each collection, as well as a few others.

Today we have added 75 new specimens to the website. All price ranges, from inexpensive thumbnails to some outstanding pieces.

New auction specimens are now posted. This week we have 80 super specimens - there are some outstanding pieces available this week. Some of the highlights include:

* very fine smithsonite from Arizona

* showy hematite/quartz from Cumbria

* neat stalactitic Tsumeb smithsonite

* beautiful golden barite from the Congo

* fine tourmalines

* a superb erythrite from Morocco

* Epidote from Knappenwand

* gem diopside from China

* Plus many, many other great specimens!

As always, we welcome your comments and suggestions.
