Subject: New Excalibur Mineral List #21009 Ready!
Attachments: 21009.pdf

Greetings Everyone!

Our last list for 2010 is in the attached PDF document. There are many new species, one-of-a-kind old classics, and minerals of general interest from diverse localities. Several large museum specimens from the Paris Exhibition of 1900 are also listed!

Please be patient with delivery as the holiday rush is in full swing already, and overseas customers may elect to defer shipping until after Christmas if desired.

Happy Holidays!

Tony Nikischer
