Welcome to Wrights Rock Shop

I created the Red Beryl Gallery on 9/22/11. According to the Smithsonian Natural Museum of History, red beryl is the rarest of all beryls. There has been a recent attempt to mine red beryl, success has not been great.

I was told that the attempt has ended . The low yield of specimens are not adequate for the amount of work and cost of production. The specimens below is the last of their production and have not been completely cleaned.
