Welcome to Wrights Rock Shop

I updated Gallery 3 with Green Fluorite octahedrons, smithsonite, ferberite in fluorite, scheelite on quartz, butterfly twin calcite, franckeite, copper after aragonite, cassiterite, chrysocolla, epidite on quartz and others on 3/16/12.

In 2001, Mike New was able to find a limited amount of fluorite octahedrons. Chinese fluorite tends not to be able to be cleaved and was available for a short period of time. We recently found these specimens in the warehouse.
