Welcome to Wrights Rock Shop

I updated Classic Gallery 11 with cuprian adamite, manganoan adamite, adamite with selenite, pink strontianite, sulphur, calcite, strontiancalcite, azurite, smithsonite, milarite, ikranite, brochantite and others. Several of these minerals just are not currently being found.

The pink strontianite, cuprian adamite (one of the most aesthetic cuprian adamite combinations that I have seen), and manganoan adamite specimens are very good.

Chris
