Subject: Minerals from Denver - Turquoise crystals, Luiz Menezes Collection others

Wrights Rock Shop

I created Denver 2013 Gallery (three pages) with gold; lustrous , bright red wulfenite; sagenite or reticulated rutile; sampsonite, almeidaite; elbaite on quartz; scepter elbaite; olenite in quartz (new find of very good blue); olenite in citrine; spangolite; hematite in quartz; xenotime; star muscovite; pericline; catseye apatite; phenakite; lepidolite on albite; ruby/sapphire; hambergite in rubellite; turquoise crystals; calcite and others on 9/24/13.

This update has a great diversity in prices and specimens. Most of the remaining specimens from the Luiz Menezes Collection are part of this gallery including the superb scepter bicolor elbaite. New finds (turquoise crystals, olenite in quartz, wulfenite, hambergite in rubellite) and new minerals (almeidaite) are, also, represented.

Hopefully on Thursday, I will create the Orange Quartz Gallery.

Please remember to mention that you are a member of Wright's Mineral News for your 10% discount.
