Subject: FEBRUARY OFFERING

Celestial Earth Minerals & Mineral of the Month Club

February 2014 Offerings

Featured Mineral

Aragonite from Morocco is the featured mineral of the month. These specimens are rich orange to brownish-orange in color and some specimens include colorless crystals as well. There are many fine display pieces available to chose from. Read our excusive Write-up to learn all about this beauty and see the Platinum letter for sizing and pricing.

Offering

This months selection continues to span the globe and consists of varying crystal structures and a rainbow of colors. Among these are red and green forms of crystalline quartz, light to bright-green dolomite, as well as two polychromatic specimens. Read more about these fabulous specimens in the Offer Sheet.

Featured Fine Mineral

Smoky quartz and amazonite from a classic locality in Colorado. These composite specimens share the spotlight as favorites among collectors because of their contrasting crystal forms and colors. Lustrous rich brown smoky quartz and blue-green amazonite are sure to please even the most discerning eye.
