We have just added over 100 new specimens to the regular website galleries. The update is highlighted by many neat rare species (some type material specimens) and strange locality specimens from the Ralph Merrill collection, as well as some very attractive new pieces from China. More of the Merrill collection material will be coming soon.

New specimens have been posted for this week's auction. There are 115 great specimens - too many good ones to feature all in this mail! Highlights include:

- * an excellent Michigan copper**
- * large single spinel crystal from Madagascar**
- * several good calcites from Pribram**
- * large cabinet superb display piece of siderite casts after calcite from Africa**
- * many good thumbnail specimens**
- * gem spodumene cabinet size piece**
- * large fine thick lustrous black terminated aegirine from Malawi**
- * large showy yellow sulfur from Italy**
- * Plus many, many others ...**

As always, we welcome your comments and suggestions.
