Subject: April Offering -Mineral of The Month Club

Celestial Earth Minerals & Mineral of The Month Club

April 2014

Dear David A.,

Due to popular demand we ordered more of the Amethyst from Namibia and it is due in this week. Don't miss out if you want to add this unique crystal to your collection, now is the time to order it! Some of these beauties have a combination of smokey and clear quartz, some with the inky purple as shown in the photo below and...some even have phantom crystals.

In response to members requests we have added Amethyst clusters from Uruguay to the mix.

Featured Mineral

We are happy to share with you the amethyst variety of quartz from the basalt formations of the Goboboseb Mountains of Namibia with you this month.

This selection ranges in color from light to dark purple, lavender, violet and lilac. There are single crystals as well as amethyst crystals in matrix.

There are a handful of specimens with both smokey and amethyst quartz that have nice translucence that are available on the platinum level.

Please read the platinum letter for more information.
