Subject: minerals (with important notice about Spam emails from my AOL account)

IMPORTANT NOTICE: Apparently the address book (not this notification list) of many AOL users have been compromised. As a result my AOL account sent out 3-4 Spam emails in the last two days. This problem will be rectified soon. In the meantime, if you receive an email only containing a link, do not click it. This email notification is a separate system and unaffected.

New minerals were added moments ago added to my web site.

The minerals are now available for viewing at these 2 pages:
