# Celestial Earth Minerals & Mineral of the Month Club

## April New Arrivals

**Beta Morion Quartz**

*Dear (Contact First Name),*

Since the Tucson Gem & Mineral Show we have been adding a vast and varied selection of crystals and minerals to the website on a weekly basis.

Two favorites this week are the beta morion quartz from Brazil and the desert rose from Mexico.

Beta morion quartz is a very rare black quartz that is formed through natural radiation caused by nearby uranium deposits, and is a sister to smokey

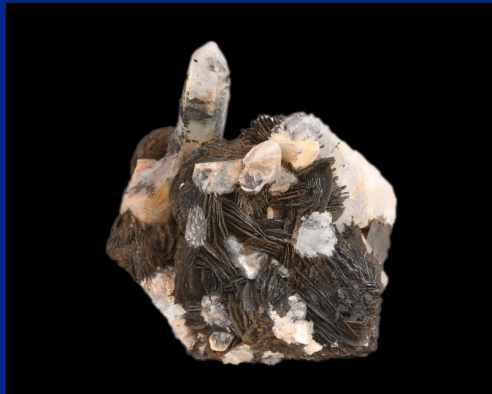

**Desert Rose**

quartz.

Desert rose is an evaporate that forms on the earth's surface and is a beautiful example of Mother Nature's shaping forces. In this case, of wind, water and pressure in dry, arid regions.

As you will see with the addition of the tumbled blue lace agate we are also expanding the selection of raw/natural and tumbled/polished minerals and crystals.
