New Magnesiofoitite Tourmalines and Rochester Update

On the website I've added a new [Magnesiofoitite Tourmaline Update](#), featuring crystals of magnesiofoitite crystals that are simply amazing for the species. These crystals are from a large collapsed pocket in Tsiondroina Commune, in the Ikalamavony District, Matsiatra Region, Fianarantsoa Province, Madagascar. Sharp and lustrous, with varied crystal habits, these crystals comprise a remarkable find.

For all new specimens at McDougall Minerals, see [New Specimens](#).

In addition, I've included a new post about the recent [Rochester Mineralogical Symposium](#) with some great photos contributed by the presenters.
