# Great Guest Editorial and Mexico Update

## **Guest Editorial on the Website: Disposing of Your Mineral Collection - Steve Chamberlain**

None of us wants to think about the inevitable, let alone plan for it. (*"What happens once the last Lord of the Rings/Hobbit movie has been made and there are no more?"* No, I mean the other inevitable - we really can't live forever.) Planning for what happens to our

mineral collections is a tough and controversial subject. I am thrilled that Steve Chamberlain, well-known U.S. mineral collector and Chairman of the Rochester Mineralogical Symposium, has agreed to share his excellent editorial on [Disposing of Your Mineral Collection \(click here\)](#), on the website. (And check out that Millerite from the Sterling Mine, Antwerp, St. Lawrence Co., New York!)

## **Mexico Update**

On the website I've added new specimens under [Mexico - June 2014 Update \(click here\)](#). Great specimens, with Excellent sharp, light green datolite crystals from Charcas, Mexico – these are super! This Mexico update also includes fine danburite crystals and some beautiful amethyst crystal specimens from Piedra Parada.

For all new specimens at McDougall Minerals, see [New Specimens](#).
