# New from France and Bancroft Gem and Mineral Club Museum

## New From France

I've added a small number of new specimens under [France - July 2014 Update \(click here\)](#). These are from the Sainte-Marie-aux Mines 2014 show. Excellent sharp, lustrous

hematite crystal groups from the Brezouard Massif, in the hills just outside of Sainte-Marie-aux-Mines itself. This update also includes some fine specimens of bournonite from Les Malines District, Saint-Laurent-le-Minier, Gard, and a very nice faden quartz from the French Alps.

### **Bancroft Gem and Mineral Club Museum**

We have a great new display of Bancroft Area minerals in the Bancroft Gem and Mineral Club Museum, which has opened in the restored historic Bancroft Train Station. On the blog, I've posted a short piece about the museum with photos, including a few of individual specimens currently on display, at [Bancroft Gem and Mineral Club Museum \(click here\)](#).

If you are coming to either of our upcoming mineral shows, or otherwise planning to be in Bancroft anytime soon, it's a must!

By the way, the 2014 shows are already around the corner: Bancroft Gem and Mineral Club is this Sunday, July 27 (at the Bancroft Legion, 10:00 am to 4:00 pm, all proceeds to the museum) and the 51st annual Bancroft Rockhound Gemboree is July 31 through August 3 (North Hastings Community Centre and Bancroft Curling Club). I will be set up at both shows (outdoors at the Gemboree) so please stop by if you're here for either one.

For all new specimens at McDougall Minerals, see [New Specimens](#).

If you are receiving this email in any format in which the above links don't work, the addresses are:
