## New from Pakistan and Afghanistan

This week I have added a small number of excellent selected specimens in a [Pakistan-Afghanistan Update \(click here\)](#). There is real variety here, with excellent elbaïtes and a gorgeous cabinet specimen of spessartine, and also some rather unusual pieces as well. There are two schorl tourmaline crystals, known as "bullet tourmalines", from the find at Laila Peak, a great single crystal of zoisite, a super sharp matrix axinite, and

three extremely cool and unique specimens from Sar-e-Sang.

For all new specimens at McDougall Minerals, see [New Specimens](#).
