New from DR Congo and Rochester 2015

New from Democratic Republic of the Congo

I've made no secret of my belief that excellent black crystals are very cool. But colour is great too, and the latest update has lots! The new [DR Congo Update \(click here\)](#) features some amazing hues of pink in beautiful specimens of cobaltoan dolomite from Katanga,

some of which have green malachite in association. The update also includes a specimen with exquisite twinned calcite crystals from Mashamba West.

Rochester 2015

The Rochester Mineralogical Symposium is a great event in the mineral year - I've added a new post if you'd like to read about [Rochester 2015 \(click here\)](#).

Just my usual reminder that prices on the website are in Canadian dollars - a good discount these days, if you are thinking in (or used to browsing online minerals in) US dollar terms.

For all new specimens at McDougall Minerals, see [New Specimens](#).

If you are receiving this email in any format in which the above links don't work, the addresses are:
