New from Morocco and Bancroft 2015

New from Morocco

I've added some super new specimens of erythrite from Bou Azzer, along with excellent new barite specimens from Bou Nahas in a new [Morocco Update \(click here\)](#).

Erythrite crystals from Bou Azzer are generally regarded as the finest in the world. The

challenge with erythrite, however, is to obtain fine-quality specimens – the mineral is so soft and delicate that most specimens are damaged in the removal process or subsequent transportation. The erythrites in this small lot are superb-quality specimens of this beautiful mineral.

The Bou Nahas barites are from a locality that has been known for quite some time, but has been the source of a few very fine specimens more recently. These barite crystals are excellent and include some great morphological complexity.

Bancroft 2015

Our shows were good fun this year as always - I've added a new post, if you'd like to read about the [Bancroft Shows 2015 \(click here\)](#).

Finally, just my usual reminder that prices on the website are in Canadian dollars - a major discount these days, if you are thinking in (or used to browsing online minerals in) US dollar terms.

For all new specimens at McDougall Minerals, see [New Specimens](#).
