Quartz with Hematite- China

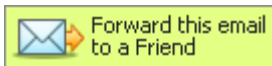

Orange Calcite- Mexico

## Coming in February

The featured mineral will be juicy Orange Calcites that were collected at the Ojuela Mine at Mapimi, in the Mapimi district, Durango, Mexico.

The calcite is emerged in a quick acid wash bath that gives it a sheen and highlights its color and patterns that may appear in it. They look so juicy to us that everyone in the office keeps saying that their mouths water every time they look at them. Ha!
