Dakota Matrix Minerals

Jan. 22, 2016

Hi Folks,

We updated yesterday with 36 New Addition minerals. There are plenty of good specimens left including those in the photos below. In addition you'll see a good **Fiji tellurium**, an old **Acanthite** from **Schneeberg**, a very nice **Cuprite with Copper from Tsumeb**, and a type locality, antique Cubanite.

Shigaite

Hematite

Cuprite

Our next update will be on **Thursday, Feb. 4** at 5pm US Mtn time. This update will have an old **Montana Petzite** and a **Butte Betekhtinite**.

During the Tucson show, I'll be uploading rare species and sending out mineral lists of what I acquire at the show. During the week of Feb. 8, I will hold Daily Five sales.

Thank you for your patronage! It is always appreciated.

Tom
