Celestial Earth Minerals & Mineral of the Month Club

June Monthly Offerings

Wishing all fathers a happy, healthy and joyous Father's Day .

Graduates, congratulations and wishing you all the success on your future endeavors!

Congrats!

Now...on to the featured mineral of the month...Fluorapatite, more commonly known as Apatite, a calcium fluorophosphate from the Cerro de Mercado iron mine near the city of Durango in the state of Durango, Mexico.

On the monthly offerings sheet you will find that Chris's Pick of the Month is Pyrolusite that was collected from the manganese deposits at the Imini Mine in Quarzazate province in Morocco.

There are several other offerings that are sure to please.

Pyrolusite- Morocco

Coming in July

The featured mineral for July will be **Almandine Garnet in matrix** that were collected in the **Borborema Pegmatite Province at Serrote Redondo, Pedra Lavrada, Paraíba, Brazil.**

Garnets have been treasured since antiquity for their range of attractive colors, hardness and excellent workability.

Archaeologists have recovered almandine amulets and talismans from 5,000-year-old Egyptian tombs and from 3,000-year-old Swedish cultural sites. In medieval times, European crusaders wore red garnets for protection in battle and to ensure their safe return.

Garnet in matrix- Brazil

Save 10% on all orders when 4 or more minerals are purchased.

Free shipping on all domestic orders over \$100.00
