## New Atacamite From Peru

I've added some great new specimens in this [Peru Atacamite Update \(click here\)](#). These are sharp, lustrous, terminated atacamite crystals in vugs, from the Lily Mine, near Pisco, Ica. Many of the smaller crystals are transparent and intense green. One piece in the Update features a water-clear selenite crystal perched on perfect atacamite crystals. Other minerals in the update include quartz-covered chrysocolla, malachite on quartz and a green quartz (with diopside inclusions).

Hope you enjoy them!

### **Bancroft Show Time!**

It's hard to believe (since only a few months ago it was below -40C up here) but our part of

the Great White North is hot this summer. And as we reach the peak of summertime, we're coming up on the Bancroft mineral shows. I hope I'll see you at one or both.

First, on Sunday, July 24, the Bancroft Gem and Mineral Club is hosting its 20th annual Gem and Mineral Show at Bancroft Legion Hall on Station Street, from 10:00 am to 4:00 pm. This year's display theme is Pegmatite Minerals. All proceeds from the show go to the Bancroft Gem and Mineral Club Museum, located in Bancroft's restored historic train station. Next, from Thursday, July 28 through Sunday, July 31, it's the 53rd Bancroft Gemboree (10:00 am - 6:00 pm each day except Sunday closing is at 5:00 pm). There are two venues, both on Newkirk Blvd. - the main arena (the North Hastings Community Centre, and the Bancroft Curling Club. At the arena show I'll be in the outdoor section under a blue tent - if you're here, please come by and say hi!

### **Canadian and US Dollar**

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens](#).
