August Monthly Offerings

Hello:

Here we are with another season having flown by. As we look to the fall we are excited about all of the new featured minerals we have to offer you.

Chris's pick of the month is the rhodochrosite from Peru that she was able to pick up on the last day at the Tucson Gem & Mineral Show. There are only a handful of these babies so if you are interested don't snooze and lose.

In the newsletter you will find information about the West Springfield Massachusetts Gem and Mineral Show that is being held August 12th, 13th and 14th. Christine will be attending the show again this year, that makes for 5 years in a row.

Featured Mineral

These visually attractive composite specimens of aquamarine and schorl are sure to enhance any collection. Aquamarine is the blue variety of beryl, the tourmaline-group mineral schorl is a basic sodium iron aluminum borosilicate.

These specimens were collected at Erongo Mountain in the Usakos and Omaruru districts, Erongo Region, Namibia.

on the gold-level the specimens are in clear perky boxes with their i.d tags. On the platinum -level we have a limited selection of hand picked specimens that are wither aquamarine alone or a composite of aquamarine and schorl.

Coming in September

This month we are featuring mottramite from Mexico's famed Ojuela Mine. This is the first time we have featured this uncommon basic lead copper vanadate in the over 15 year history of Mineral of the Month club.

The write-up discusses mottramite's history, properties, and occurrence, and explains the nature of solid-solution series.
