### New From France

I've posted beautiful new specimens in this [France Update \(click here\)](#). There are great pieces recently collected from the Mésage Mine, Saint-Pierre-de-Mésage, Isère, France - these include combinations of ankerite, pyrite and quartz, siderite, and bournonite specimens. This Update also includes bournonite from Saint-Laurent-le-Minier and a gem-clear calcite from Pau, Aquitaine.

### Sainte-Marie-aux-Mines 2016

If you'd like to read about the Sainte-Marie-aux-Mines show, I've posted a report with lots of photographs, including some photos of the spectacular new aragonites. [Click here.](#)

### Rochester 2016

Also on the blog, I've posted a write-up about this year's Rochester Mineralogical Symposium - if you missed attending, it was great - I've included photo contributions from the speakers. I've also included the list of next year's speakers (hot off the press)... Rochester 2017 will be great. [Click here.](#)

Hope you enjoy the new specimens and posts!

## **Canadian and US Dollar**

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens.](#)
