## Spectacular New Moroccan Aragonites

I've added some superb aragonite specimens from a new find in Morocco in this [Aragonite Update \(click here\)](#).

These aragonites are from a completely new locality - Mamsa, north of Sidi Ayed, Morocco. The best from this find rank among aragonites from top historic aragonite localities. The vast majority of Mamsa specimens found to date have been of poor quality, many were contacted across the cavities, and almost all recovered specimens are significantly damaged. Many poor-quality specimens were collected.

The specimens in this Aragonite Update were selected by Tomasz Prazkier, in Morocco - he estimated that he went through hundreds of flats' worth of material to bring back around twenty top quality specimens. These specimens are the top ones available from that group of specimens. They are special.

Hope you enjoy them!

## Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens](#).
