### Celestial Earth Minerals & Mineral of the Month Club

## October Monthly Offerings

Hello:

It is official fall is here and we are kicking it off with agate geodes from Brazil, next month will be fiery pyrite from Peru.

On pages 8, 9 and 10 of the write-up you will find a special section, titled "All about Agate." It presents an in-depth look at the theories of agate formation and the origin of their banded patterns, broad range of colors and a list of the most popular types of agate.

At the end of each month we will photograph any previous offerings and post them to our Etsy Shop, [www.etsy.com/shop/CelestialEarth7](http://www.etsy.com/shop/CelestialEarth7) and no longer offer them on current offering sheets.

So, **don't miss out** on members only **free shipping** on domestic orders of \$100.00 or more and the **10% discount** on 4 or more items purchased from the offering and/or featured mineral sheets.

## Featured Mineral

Agate is a form of microcrystalline quartz that forms multicolored patterns and bands. Our specimens are cut and polished nodules or geodes and are from the well known Soledade in Rio Grande do Sul, Brazil, also known as "City of Precious Stones."

Agate Geode- Brazil

## Monthly Offerings

The minerals on the Monthly Offerings Sheet are sure to please.

Christine's pick of the month is the the clustered crystals of selenite from Australia. These specimens have the long, thin blades that are beautifully formed, terminated, and extremely delicate, some even look like flowers.

Selenite - Sonora, Mexico

Read the offering sheet for all the glorious details.

## Coming in November

This month we will be featuring pyrite from Huanzala, Peru. These specimens consist of clusters of pyrite in the form of lustrous, striated pyritohedrons.

They are really quite nice specimens. We hope that you are as thrilled with them as we are.

Pyrite Cluster - Peru

**Save 10% on all orders when 4 or more minerals are purchased.**

**Free shipping on all domestic orders over \$100.00**
