Rochester 2017 Report

Sorry I've been a bit quiet with postings lately - I'm back to preparing more updates for the coming weeks, including some really great specimens.

Although this blog post is a bit later than I had intended, I hope you'll find the content was worth the wait! There are many excellent contributed photographs from the talks, including from the prominent mineral photographers Jeff Scovil and Michael Bainbridge.

The [Rochester Mineralogical Symposium 2017 \(click here for the blog post\)](#) was superb! (and fun!) If you missed it, I hope this will catch you up, and perhaps inspire you to plan to come to RMS 2018.

The above photo was presented in Rochester - it is a truly remarkable 7cm specimen of intense orange, glassy chabazite crystals from Wasson's Bluff, Nova Scotia. From the Terry Collett collection, photographed by Ronnie van Dommelen.

Hope you enjoy the read!

Coming up next...

Next up, excellent specimens from new finds acquired in Ste. Marie, along with a blog post about this year's Ste. Marie show.
