## New from the John S. White Collection

I've added beautiful new specimens from the John S. White collection ([click here](#)). The theme of this update began as quartz with inclusions, but in the end there are specimens exhibiting other great phenomena as well – phantoms, zoning, selective deposition. In some cases, the additional mineral is truly the feature – indeed, a few of these specimens might better be characterized as rutile with quartz. There are also wonderful specimens with hematite, tourmaline, and more.

Hope you enjoy the update!

**Canadian Dollar**

The currency disparity remains in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).
