New superb world specimens from the Gerald Panneton Collection

I've posted new worldwide mineral specimens from the Gerald Panneton collection ([click here](#)). This update features spectacular pieces, some of which are right up with the best I've offered on the website. Fantastic gem crystals, including aquamarine, topaz, tourmaline and spessartine, great fluorite, classic Tsumeb diopside and azurite, Red Cloud wulfenite, contemporary classic cassiterite, titanite and fluorapatite, a superb Romanian vivianite, top Swiss quartz, and more. I hope you enjoy these wonderful specimens!

Canadian Dollar
